Ready-made window panes, especially for motor vehicles.

Patent Number: EP0128837
Publication date: 1984-12-19
Inventor(s): DESCHAMPS BRUNO;; HOCHART PAUL;; SOURBE JEAN-CLAUDE
Applicant(s): BOUSSOIS SA (FR); ADHESIFS INSONORIS MODERNES (FR); LAQUES INDOCHINOISES ET DU CAO (FR)
Requested Patent: ☐ EP0128837, B1
Application Number: EP19840401190 19840608
Priority Number (s): FR19830009649 19830610
IPC Classification: B60R13/06
EC Classification: B29C65/34, B60J10/02, B29C35/02L
Equivalents: ☐ DE128837T, DE3464031D, ☐ FR2547345

Abstract

1. A glass pane ready for fitting in a rigid frame (2), more particularly for motor vehicles, the pane having on its inside surface (1_a) a plastic cord or tape or the like (6, 26, 36) heatable electrically through Joule effect by means of an electrically resistive metal element associated with the cord or tape or the like and thus to be secured to the rigid frame (2) by sticking, the pane having right around its periphery (3) a flexible plastics finishing seal (4, 20, 30, 31) having on its surface remote from such periphery means (8, 32) for providing a sealing connection with the frame (2) and for compensating for dimensional differences between the same and the pane, characterised in that the finishing seal (4, 20, 30, 31) covers some of the pane inside surface (1_a), the cord or tape or the like (6, 26, 36) is disposed in contact with the seal (4, 20, 30, 31) and the electrically resistive metal element (7, 20) is embedded partly in the seal (4, 20, 30, 31) and partly in the cord (6, 26, 36) to enable heating.
